

## Laser Vision Provider Checklist

The decision to have laser vision correction is an important one that you should make carefully, not quickly. Choose a practice that focuses on safety, diagnostic technology, post-operative follow-up and has a surgeon with experience. We hope you'll choose Jones Eye Centers as your provider, but if you're shopping around, use this checklist to compare.

	<b>Yes</b>	<b>No</b>
Does the surgeon perform at least 500 laser vision procedures per year?	_____	_____
Does the center have its own laser and are they responsible for its maintenance and calibration?	_____	_____
Does the surgeon have access to the LADARVision® Excimer laser with the LADARTracker™ that is the only tracker that can track eye movement up to 4000 times per second?	_____	_____
Does the center have access to the Vixx Star S3 with the WavePrint™ diagnostic system?	_____	_____
Does the surgeon use powderless gloves? (Many doctors wear no gloves to save money.)	_____	_____
Does the center sterilize all the instruments for each eye and use a separate blade in the microkeratome for each eye? (Another cost savings step that is not as safe.)	_____	_____
Does the center use the Orbscan diagnostic device or use wavefront analysis to take measurements of the eye pre-operatively?	_____	_____
Does the surgeon personally evaluate each patient prior to surgery?	_____	_____
Does the center take the time to explain complex issues such as monovision and presbyopia and how they will affect your vision after age 40?	_____	_____
Does the practice do tests for 'dry eye' before the procedure?	_____	_____
Does the center offer free enhancements for a year after the procedure?	_____	_____
